Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 38 is objected to because of the following informalities: Claim 38 depends on itself. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-15, 17-34, 36-54 and 70-81 are rejected under 35 U.S.C. 102(e) as being anticipated by Hsu et al (US 6,506,643).

The present claims generally require a ferroelectric circuit memory comprising a three dimensional capacitor laminate which comprises a bottom electrode, a ferroelectric film and a top electrode, wherein the 3D shape has substantially directional components in three mutually orthogonal planes.

Hsu et al disclose a method for forming a damascene FERAM cell structure which comprises a ferroelectric structure. See the Abstract. Hsu et al disclose a ferroelectric capacitor which comprises a bottom electrode, a ferroelectric film over the

bottom electrode and a top electrode. See column 2, lines 40-60. The 3-D shape has substantially directional components in three mutually orthogonal angles. See Figures 1-3. The ferroelectric material is made from superlattice components which comprise niobium and tantalum as required by the afore mentioned claims. See column 4, lines 1-10. Moreover, Hsu et al disclose thicknesses of the electrode layers and ferroelectric film as required by the aforementioned claims. See column 4, lines 55-65. Furthermore, the capacitance area is greater than the capacitor footprint area as required by some of the present claims. See Figure 3, Therefore, Hsu et al anticipate the aforementioned Claims.

Allowable Subject Matter

Claims 16, 35 and 55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The cited prior art does not disclose the hydrogen barrier layer comprising strontium tantalite as required by the present claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander G. Ghyka whose telephone number is (571)
